<b>Implementation</b>	<b>Common Misconceptions</b>		<b>Probability 13</b> <ul style="list-style-type: none"> <li>Not understanding the words mutually exclusive</li> <li>For conditional probability, not reducing the denominator</li> <li>Not laying out tree diagram correctly</li> <li>When constructing a Venn diagrams for a given situation, some pupils may struggle to distinguish between elements that are included in the intersection of both regions or only in one of the regions</li> <li>Some pupils may muddle the conditions for adding and multiplying probabilities</li> <li>Some pupils may add the denominators when adding fractions</li> <li></li> </ul>		<b>Multiplicative Reasoning 14</b> <ul style="list-style-type: none"> <li>Having new amount at bottom of percentage change calculation</li> <li>Correct multipliers mis-applied</li> <li>Not converting units to same unit for DST Qs</li> <li>Some pupils may incorrectly think <math>0.111111... = \frac{1}{11}</math></li> <li>Some pupils may think that an the amount created by increasing a quantity by 5% repeated four times is the same as increasing the quantity by 5% and multiplying that amount by 4.</li> <li>Some pupils may think the percentage multiplier for a 20% increase (or decrease) is 0.2</li> </ul>		<b>Construction, Loci and Bearings 15</b> <ul style="list-style-type: none"> <li>Mixing up plans with elevations</li> <li>Mis-reading protractor by reading wrong way</li> <li>Not applying correct construction to solve loci problem.</li> <li>When constructing the bisector of an angle some students may think that the intersecting arcs need to be drawn from the ends of the two lines that make the angle.</li> <li>When constructing a locus such as the set of points a fixed distance from the perimeter of a rectangle, some students may not interpret the corner as a point (which therefore requires an arc as part of the locus)</li> <li>The north elevation is the view of a shape from the north (the north face of the shape), not the view of the shape while facing north.</li> </ul> <b>Graphs 16</b> <ul style="list-style-type: none"> <li>Misapplying FOIL method.</li> <li>Feathering quadratic graphs</li> <li>Misapplying the completing the square method.</li> <li>Some pupils may think the graphs of all quadratic functions intercept the x-axis in one or two places.</li> <li>Some pupils may think that gradient has the same value for all points for all functions</li> <li>Some pupils may join the graph of <math>y = a^x</math> (<math>a &gt; 1</math>) to the x-axis</li> <li>Some pupils think that the horizontal section of a distance time graph means an object is travelling at constant speed.</li> <li>Some pupils think that a section of a distance time graph with negative gradient means an object is travelling backwards or downhill.</li> </ul>

Enabling or Adapting the Curriculum	SEND Students	<p><b>Probability 13</b></p> <ul style="list-style-type: none"> <li>• Multiplications grids available to support times tables</li> <li>• Number lines in classrooms to support counting</li> <li>• Fraction walls available in lessons</li> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames</li> </ul>	<p><b>Multiplicative Reasoning 14</b></p> <ul style="list-style-type: none"> <li>• Triangle formulae shared eg DST</li> <li>• 1-100 grid to consolidate percentage understanding</li> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames</li> </ul>	<p><b>Construction, Loci and Bearings 15</b></p> <ul style="list-style-type: none"> <li>• Physically shown how to use compass, protractor and ruler</li> <li>• Bearings rules shared</li> <li>• Real life bearings and loci examples used</li> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames</li> </ul> <p><b>Graphs 16</b></p> <ul style="list-style-type: none"> <li>• Axes templates pre-drawn</li> <li>• Grid method instead of FOIL method</li> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames</li> </ul>
	Disadvantaged Students	<ul style="list-style-type: none"> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames when answering problem solving questions</li> <li>• Necessary equipment to support in lessons</li> </ul>	<ul style="list-style-type: none"> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames when answering problem solving questions</li> <li>• Necessary equipment to support in lessons</li> </ul>	<ul style="list-style-type: none"> <li>• Scaffolding worksheets to gradually build to independence</li> <li>• Modelled examples</li> <li>• Sentence starters and writing frames when answering problem solving questions</li> <li>• Necessary equipment to support in lessons</li> </ul>
	More Able Students	<ul style="list-style-type: none"> <li>• Show me an example of a Venn diagram. And another. And another</li> <li>• Show me an example of a two-way table. And another. And another</li> </ul> <p>Always / Sometimes / Never: All the regions of a Venn diagram must be populated</p>	<ul style="list-style-type: none"> <li>• Show me a fraction that can be expressed as a recurring decimal. And another. And another ...</li> <li>• Always/Sometime/Never: If the denominator is odd, the fraction can ve expressed as a recurring decimal</li> <li>• Convince me <math>\frac{1}{7}</math> can be expressed as a recurring decimal</li> <li>• Convince me <math>0.999999999 \dots = 1</math></li> </ul> <p>Kenny thinks that the interest gained when £100 is increased 20% per annum for 4 years can be calculated by multiplying £100 by 2.0736. Do you agree with Kenny? Explain your answer.</p>	<p><b>Construction, Loci and Bearings 15</b></p> <ul style="list-style-type: none"> <li>• (Given a single point marked on the board) show me a point 30 cm away from this point. And another. And another ...</li> <li>• Provide shapes made from some cubes in certain orientations. Challenge students to construct the plans and elevations. Do groups agree?</li> <li>• If this is the plan: </li> </ul> <p>show me a possible 3D shape. And another. And another.</p> <ul style="list-style-type: none"> <li>• Demonstrate how to create the perpendicular bisector (or other constructions). Challenge students to write a set of instructions for carrying out the construction. Follow these instructions very precisely (being awkward if possible; e.g. changing radius of compasses). Do the instructions work?</li> </ul> <p>Give students the equipment to create standard constructions and challenge them to create a right angle / bisect an angle</p> <p><b>Graphs 16</b></p> <ul style="list-style-type: none"> <li>• The answer is <math>2x^2 + 10x + c</math>. Show me a possible question. And another.</li> <li>• Kenny simplifies <math>\frac{3x^2+x}{x}</math> as <math>3x^2 + 1</math>. Do you agree with Kenny? Explain.</li> <li>• Convince me that <math>103^2 - 97^2 = 1200</math> without a calculator.</li> <li>• Convince me that <math>4x^2 - 9 \equiv (3x - 2)(3x + 2)</math>.</li> <li>• Jenny thinks that <math>(3x - 2)^2 = 3x^2 + 12x + 4</math>. Do you agree with Jenny? Explain your answer.</li> </ul> <p>Convince me that <math>\frac{2x^2+5x+2}{2x+1} = x + 2</math></p>

**Literacy/Numeracy Skills**

**LITERACY**

**Reading:**

Probability 13

Key Words

Outcome, equally likely outcomes  
 Event, independent event, dependent event  
 Tree diagrams  
 Theoretical probability, experimental probability  
 Random  
 Bias, unbiased, fair  
 Enumerate  
 Set  
 Conditional probability  
 Venn diagram

Multiplicative Reasoning 14

Key Words

Fraction  
 Mixed number  
 Top-heavy fraction  
 Percentage change, percentage increase, percentage increase  
 Compound interest, Simple interest  
 Terminating decimal, Recurring decimal  
 (Exponential) growth, decay

Construction, Loci and Bearings 15

• Key Words  
 Perpendicular bisector  
 Scale Factor  
 Similar  
 Congruent  
 Invariance  
 Transformation  
 Rotation  
 Reflection  
 Translation  
 Enlargement

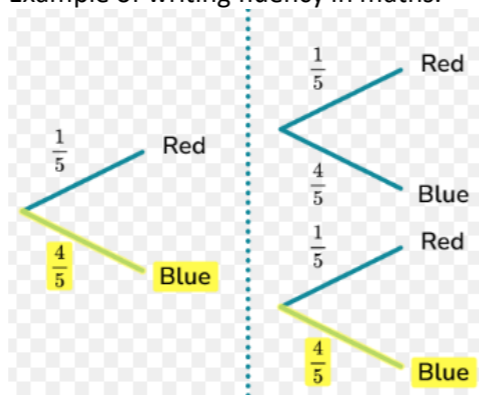

Graphs 16

Key Words

- Add and subtract algebraic fractions
  - Multiply and divide algebraic fractions
  - Simplify an algebraic fraction
  - Expand the product of three binomials
  - Expand the product of two binomials involving surds
  - Factorise an expression involving the difference of two squares
  - Factorise a quadratic expression of the form  $ax^2 + bx + c$  ( $a$  is prime)
  - Factorise a quadratic expression of the form  $ax^2 + bx + c$  ( $a$  is composite)
  - Identify when factorisation of the numerator and/or denominator is needed to simplify an algebraic fraction
  - Simplify an algebraic fraction that involves factorisation
  - Change the subject of a formula when more than two steps are required
- Change the subject of a formula when the required subject appears twice

**Writing:**

Writing reasoning with correct punctuation & use of mathematical keywords & symbols.  
 Example of writing fluency in maths:

Writing reasoning with correct punctuation & use of mathematical keywords & symbols.  
 Example of writing fluency in maths:

$Speed = \frac{distance}{time}$   
 $time = \frac{distance}{Speed}$   
 $distance = speed \times time$   
 $Speed = 100km/hr$   
 $time = 0.5hrs$   
 $d = 100km/hr \times 0.5hr$

Writing reasoning with correct punctuation & use of mathematical keywords & symbols.  
 Example of writing fluency in maths:

**Oracy:**

Incidental language based on ability groups.  
 Example of spoken fluency in maths:

Probability of an event occurring	=	$\frac{\text{Number of ways it can occur}}{\text{Total number of outcomes}}$
-----------------------------------	---	--

Incidental language based on ability groups.  
 Example of spoken fluency in maths:

25% is a quarter, so if you want to find 25% of something, divide it by 4.  
 20% is a fifth, so if you want to find 20% of something, divide it by 5.

Incidental language based on ability groups.  
 Example of spoken fluency in maths:

- A locus is all the possible positions that can be described by a rule
- E.g.
- Describe the locus of an object that is always 2cm from point D
